10 worst places for children to get pneumonia World Vision March 19th, 2018. Most children who die from pneumonia succumb to the disease in their first two years of life. The best way to protect them from catching pneumonia is for their mothers to breastfeed them exclusively during their first six months and provide balanced nutrition through age 5 years. Alfonso Rosales, World Vision's senior technical adviser for maternal, newborn, and child health.

Car sickness in children. Can I prevent it? Mayo Clinic December 25th, 2019. Car sickness is a type of motion sickness. Motion sickness occurs when the brain receives conflicting information from the inner ears, eyes, and nerves in the joints and muscles.
Child undernutrition remains one of Africa's most fundamental challenges for improved human development. Because the time and capacities of caregivers are limited, far too many children on the continent are unable to access and effectively use the food and health services they need for a healthy life.
